PROTECT YOUR INVESTMENT

Available in indoor and outdoor models, our standard fan-cooled projector enclosures are specifically designed to filter and cool ambient air, expel internal hot air, and keep your projector investment working for you longer in a safe and optimal environment.

FEATURES:

- Filtered air intake
- Thermostatic Fan Cooling
- Optical Projection Window
- Internal Electrical Outlet
- Watertight Electrical Connection
- Powdercoat Finish

Please consult a representative for enclosure sizing for your projector.

Accommodate any projector, any location.
